Nomination #	150252	Fisheries Scientist	Date
Revision Year:	2016	Habitat Operations Manager	Date
Revision to:	Atlas _____ Catalog _____ Both _____	AWC Project Biologist	15 July 15 Date
Revision Code:	F-1	GIS Analyst	Date

Site Information Survey: SEA14TBR26 Date Observed: 08/03/2014 Legal Desc.: C071S082E20 Latitude Longitude Datum
Site: 10103421 55.69828 -132.86909

Observation Information

Life History: Unknown

Species/LifeStage: cutthroat trout juvenile

Sampling Method (No. of fish): B (1)

Key To Sample Events

Sample ID: (A) Sample Gear: Minnow Trap
Sample ID: (B) Sample Gear: Minnow Trap

one fish, anadromy unknown

Additional Comments: This information was collected as part of ADF&G's Fish Passage Project. This nomination supports the addition of a currently uncatalogued tributary to AWC Lake #102-70-10580-2035-3013-0020, Control Lake. This nomination supports the addition of cutthroat trout present to the creek and while only one fish was captured numerous other unidentified juvenile fish were observed well upstream from the road crossing and downstream. Further investigation of this creek is suggested to establish extent of anadromy, all species present, and correct stream course. Downstream from culvert channel has large rip rap steps. Stream eventually levels out to nice glides, ripples and pools, fish observed downstream from culvert. Fish also observed over 400 feet upstream from culvert. Upstream shows signs of logging, nice habitat upstream. Another small stream joins this one about 250 feet downstream. Stream also takes various seeps. Trap A set 50 feet upstream and Trap B was set 5 downstream from culvert in outlet pool.

Name of Observer: Mark Eisenman, Habitat Biologist
