Additional Comments: This information was collected as part of ADF&G's Fish Passage Assessment Project. This nomination supports the addition of a small tributary to AWC Stream #108-10-10050, Pat Creek. Stream runs under Zimovia Highway and then confluences with Pat Creek about 100 feet downstream. This nomination supports the addition of cutthroat trout to this stream. Upstream channel buried under slash. Culvert was placed recently when bridge was redone, first 3-4 grade points are manmade rock/log weirs. One cutthroat trout trapped, there are no barriers between this stream and the neighboring anadromous stream, Pat Creek. Clear cutting upstream of culvert. Trap A set 120 feet upstream, Trap B set 50 feet downstream of culvert.
