Additional Comments: This information was collected as part of ADF&G's Fish Passage Assessment program. This nomination supports the addition of a previously unmapped creek for the presence of juvenile dolly varden. Construction and land clearing downstream. Nice habitat upstream, creek is shallow and may dry up during parts of the year. Thick vegetation upstream and downstream. Fish observed upstream (dolly varden). Trap A set 40 feet upstream and Trap B set 10 feet downstream from culvert.
