Additional Comments: This information was collected as part of the ADF&G Fish Passage Project. This nomination supports the addition for presence of cutthroat trout in a AWC stream #108-40-10290. Tributary confluence 20' above inlet. Local residents claim that pinks try to make it into the outlets. Excellent spawning and rearing habitat upstream. There are two tributaries that join up just before entering culverts. Both traps set about 130 feet upstream in different channels.
