Key To Sample Events

Sample ID: (A) Sample Gear: Minnow Trap
 Sample ID: (B) Sample Gear: Minnow Trap

Dolly Varden anadromy unknown

Additional Comments: This information was collected as part of ADF&G's Fish Passage Assessment project. This nomination supports the addition of a previously uncatalogued stream and the addition of dolly varden present and rearing. Upstream creek spreads out where it hits an old road grade and regains definition about 150 feet upstream. Upstream valley appears to have been used to yard logs when area was cut. Juvenile fish observed upstream and downstream of culvert. USFS placard lists dolly varden and coho in the creek. About 500 feet upstream there is a large log barrier with about a 5 foot drop and plunge. Upstream gradient about 1 to 2 percent for over 500 feet. Very dense vegetation for about the first 200 feet.
