Additional Comments: This information was collected as part of the ADF&G Fish Passage Project. This nomination supports the addition for presence of dolly varden char and cutthroat trout in a small uncatalogued tributary to Sweetwater Lake (106-30-10670-2004) on the north end of Prince of Wales Island. Clearly backwatered. Deep, marshy, likely beaver influenced both up and downstream. Above 400' upstream gravel bars and channel complexity are present. Fish observed, dolly varden and cutthroat trapped.
