Observation Information

Life History: Species/LifeStage: Dolly Varden juvenile/adult Sampling Method (No. of fish): A (2)

Key To Sample Events

Sample ID: (A) Sample Gear: Minnow Trap  
 Sample ID: (B) Sample Gear: Minnow Trap

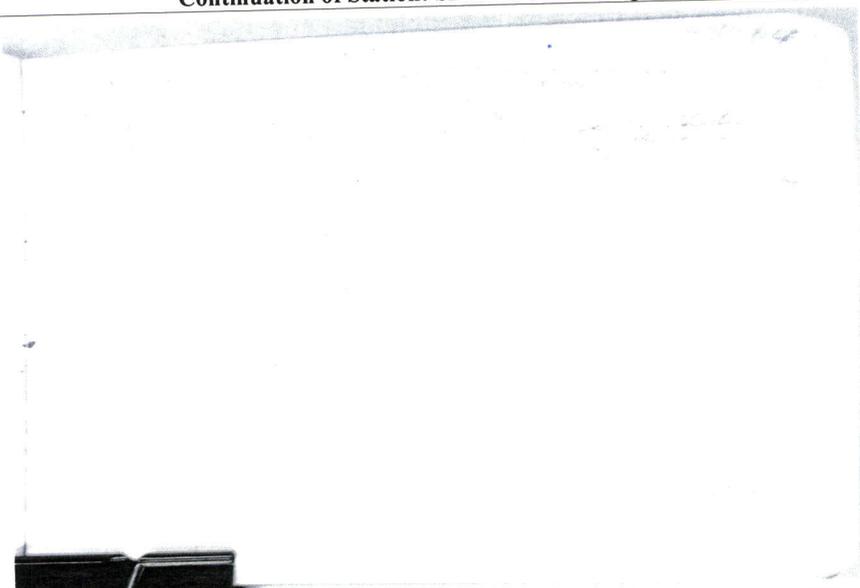

*DV Anadromy on known*

Additional Comments: This information was collected as part of the ADF&G Fish Passage Project. This nomination supports the addition for presence of dolly varden char in a small uncataloged tributary to Hobo Creek (108-60-10048) on the north end of Mitkof Island. Below outlet stream flows subsurface in places. Above the inlet stream energy is low and habitat likely ends within 100'. Pipe curves slightly.
