Add new stream w/ coho salmon rearing  
 DV anadromy unknown

**Additional Comments:** This information was collected as part of the ADF&G Fish Assessment Passage Project. This nomination supports the addition for presence of dolly varden char and coho salmon in a small uncatalogued stream that empties directly into Thorne Bay. 40' waterfall 250' upstream. Creek confluence with ditch creek at 100' downstream. Trap A set 10 feet upstream and Trap B set 100 feet downstream from road crossing. Recommend further investigation to establish full extent of anadromy, all species present, and correct stream course.
