Observation Information

Life History:

Species/LifeStage: Dolly Varden juvenile/adult  
Species/LifeStage: coho salmon juvenile

Sampling Method (No. of fish): A (1)  
Sampling Method (No. of fish): A (4) B (2)

Key To Sample Events

Sample ID: (A) Sample Gear: Minnow Trap  
Sample ID: (B) Sample Gear: Minnow Trap

*update stream by dec,  
Reposition lower pt  
Add coho salmon REARING*

**Additional Comments:** This information was collected as part of ADF&G's Fish Passage Assessment project. This nomination provides additional information for AWC Stream #103-60-10480 and supports the addition of juvenile coho salmon present and rearing and dolly varden char present and rearing. Outlet empties directly into tidal zone, and the outlet appears to become partially inundated during high tides. Upstream slash is heavy in channel from power line easement. Habitat is poor with little channel complexity through power line easement. 70' upstream habitat improves greatly where stream enters a mature forest. Upstream gravel bars and pools are present and habitat is of good quality. Both traps set upstream, Trap A set 30 feet upstream, Trap B set 40 feet upstream. Stream coarse should be correct to flow though culvert on map. Recommend further investigation to establish extent of anadromy, all species present, and correct stream course.

Name of Observer: Mark Eisenman, Habitat Biologist

CRAIG/KLAWOCK/HOLLIS RD

10103352

1020010789

update hydro, reposition lower pt for 103-60-10480,  
add coho salmon rearing, use arc2016 for hydro

103-60-10480
