only one fish

Additional Comments: This information was collected as part of ADF&G's Fish Passage Assessment project. This nomination supports the addition of an unmapped tributary to AWC Stream #102-70-10580, Thorne River and also supports the addition of juvenile coho salmon present and rearing. This nomination can be combined with site 10103401 (TBR06) which is 30 feet upstream on Throne Bay Road. Trap A was set above upstream culvert, Trap B was set about 30 feet downstream of outlet. Recommend further investigation of this stream to establish full extent of anadromy, all species present, and correct stream course.
