Additional Comments: This information was collected as part of the ADF&G Fish Passage Project. This nomination supports an extension of anadromous fish habitat for AWC stream 102-70-10580-2031-3016 to above the road crossing at least 130 feet. This nomination also supports an addition for presence of cutthroat trout and a backup for coho salmon. Upstream is primarily bedrock-controlled. Coho and cutthroat trapped. Corrosion and pitting along length of pipe's floor. Trap A set 120 feet upstream and Trap B set 15 feet downstream. Further investigation suggested to establish extent of anadromy, all species present and correct stream course.
