Observation Information

Life History:

Species/LifeStage: coho salmon juvenile Sampling Method (No. of fish): B (2)  
Species/LifeStage: general fish observation, no species informati Sampling Method (No. of fish): C (0)

Key To Sample Events

- Sample ID: (A) Sample Gear: Minnow Trap
- Sample ID: (B) Sample Gear: Minnow Trap
- Sample ID: (C) Sample Gear: Visual Observation, Ground

Extend creek, add coho salmon rearing to creek.

**Additional Comments:** This additional nomination provides information to support fish presence for juvenile coho for 101-45-10070-2011. This information was collected as part of the ADF&G Fish Passage Project. Upstream trap was set 30' from culvert and produced no fish. Downstream trap was located 20' from culvert and produced 2 juvenile coho. Culvert is only a few hundred feet from estuary. No barriers other than culvert observed. Spawning gravels above and below culvert. No fish caught above culvert, but numerous salmonids observed. This creek empties into Herring Cove Creek (AWC# 101-45-10070) which is documented for coho.
