Site: 10103414 55.69606 -132.77980

Observation Information

Life History: Anadromous

Species/LifeStage: coho salmon juvenile

Sampling Method (No. of fish): C (5)

Life History: Unknown

Species/LifeStage: cutthroat trout juvenile/adult

Sampling Method (No. of fish): B (1)

Key To Sample Events

Sample ID: (A) Sample Gear: Minnow Trap
Sample ID: (B) Sample Gear: Minnow Trap
Sample ID: (C) Sample Gear: Visual Observation, Ground

need better method to confirm species?

Add new creek w/ coho salmon rearing

Additional Comments: This information was collected as part of ADF&G's Fish Passage Assessment project. This nomination supports the addition of a previously uncatalogued tributary to AWC Stream #102-70-10580-2031, Rio Roberts Creek. While no Coho salmon were caught during visit juvenile coho were observed downstream of the road crossing and one cutthroat trout was captured in the downstream trap. There is a split upstream at about 57 feet. Upstream of this point for at least the 200 feet walked the stream braids and meanders back and forth through an old logging road prism. Downstream habitat includes step pools and glides. Trap A set 125 feet upstream, Trap B set 75 downstream from culvert. Further investigation of this site recommended to establish extent of anadromy, all species present, and correct stream course.

Name of Observer: Mark Eisenman, Habitat Biologist
