**Additional Comments:** This information was collected as part of the ADF&G Fish Passage Project. This nomination supports the addition for presence of dolly varden char in 106-44-10135 on Mitkof Island, and also provides backup information to support the presence of coho salmon. Small tributary enters stream at 75' upstream. Big legacy wood in stream, deep pools and well-developed channel, overall excellent habitat. Hundreds of coho fry observed. Downstream channel goes under a log and travels subsurface briefly 6' below culvert.
