Additional Comments: This information was collected as part of the ADF&G Fish Passage Project. This nomination supports the addition for presence of cutthroat trout in 106-30-10670-2004-3029. This nomination also provides backup information to support the presence of coho salmon. Forest Service Road Crossing tags at the site indicated that Forest Service biologists have identified dolly varden at this site in the past. Both upstream and downstream have been logged, but there is still plenty of legacy wood and corresponding pool habitat.
