OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous

**IMPORTANT:** Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

**Comments:**  
 This stream number is not official until the 2015 update is finalized. Stream Number should be accurate by the time this nomination is looked. This stream should be connect to the Big River (191-20-13600), but could not do this for the 2015 update due to Stream No. 191-20-13600-2046 stream arc being in the way. Have submitted a nomination to shorten 191-20-13600-2046 so that 191-20-13700 can be accurately depicted. Coordinates (Lat,Long): Upper(59.9770,-141.693) Lower(59.9610,-141.692)
