IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments:
The stream arc is longer then it should be. The stream arc should be shorten to show that stream ends just on the other side of the Mitkof Highway.

Water body name:

Water body number: 106-44-10190

Watershed: Petersburg Creek-Frontal Wrangell Narrows

MTR: C060S080E **Quad:** Petersburg C-3

Findings: We tracked this stream and found it differs from the AWC. This stream ended in a mossy trickle upstream of the culvert.

Recommendations: Update the current route in the Anadromous Waters Catalog.
