OBSERVATION INFORMATION

| Species         | Date(s) Observed | Spawning | Rearing | Present | Anadromous |
|-----------------|------------------|----------|---------|---------|------------|
| coho salmon     | 05/20/2015       |          | ✓       |         |            |
| cutthroat trout | 05/20/2015       |          |         | ✓       |            |
| Dolly Varden    | 05/20/2015       |          |         | ✓       |            |
|                 |                  |          |         |         |            |
|                 |                  |          |         |         |            |

**IMPORTANT:** Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

**Comments:**

We sampled a tributary to Bootcamp Creek with an electrofisher and GPS. We documented juvenile coho salmon rearing up to waypoint 72. Fish habitat likely extends past waypoint 72, however due to low water we could not sample further. We will sample again at high flows.  
Coordinates (Lat,Long): Upper(58.7921,-135.0777) Lower(58.7904,-135.0779)

*Revise hydro for 115-10-10200, reposition pts  
Add new stream 115-10-10200-2005 at coho salmon rearing*

**115-10-10200 BOOTCAMP CREEK****ADDITION****Water body name:****Survey date:** 5/20/2015**Water body number:** 115-10-10200 tributary**Species & Lifestage:** CO**Watershed:** Admiralty Island-Frontal Lynn Canal**MTR:** C035S062E **Quad:** Juneau D-4

**Findings:** We sampled a tributary to Bootcamp Creek with an electrofisher and GPS (Table 1). We documented juvenile coho salmon rearing up to waypoint 72 (Figure 1). Fish habitat likely extends past waypoint 72, however due to low water we could not sample further (Figure 2). We will sample again at higher flows.

**Recommendations:** Please add this stream to the AWC (Figure 3).

**Nomination:** Pending
