OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
coho salmon	05/20/2015		✓		

**IMPORTANT:** Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

**Comments:**  
 We sampled Bootcamp Creek with an electrofisher and GPS, and documented juvenile coho salmon rearing up to waypoint 60. Please correct the stream route and extend the upper limit of coho salmon rearing to waypoint 60 in the AWC. Please see previous nomination for ARCGIS files.
