 Public Review Nomination for Waters
 Important to Anadromous Species

1984 REVISION

84-327

Addition

Deletion

Name of Waterbody (if known): Airport Drainage Ditch

Location:

Anadromous Waters Catalog Volume and Number Region I SE Alaska

USGS 1:63,360 Quadrangle Yakutat B-5, ~~C-5~~

or 1:250,000 (if 1:63,360 not available) _____

Species	Date(s) Observed	Stage(s) (Spawning, Rearing, Migration)
Coho Salmon	May 11, 1984	Rearing
		ALASKA DEPT. OF FISH & GAME
		OCT - 4 1984
		HABITAT REGIONAL OFFICE

Comments: Please provide any clarifying information. Also, please include a map of the area identifying the stream reach. This can be a copy of the map from the Anadromous Waters Atlas.

The drainage ditch in contention is a tributary of Tawah creek which has historically been a producer of coho salmon. Fry trapping on May 11, 1984 confirmed the presence of rearing coho fry.
