P	1980	Spawning - Migrating
DV	"	Rearing

Comments: Please provide any clarifying information. Also, please include a map of the area identifying the stream reach. This can be a copy of the map from the Anadromous Waters Atlas.

Add Pink Salmon + Dolly Varden

- add P. requested info. that DV are anadromous, 1-6-83.

If there are pink salmon in this stream then there are anadromous D.V. Simple as that W.E.J.

Don: If you check w. the CF & SF Biologists you most likely will not find anyone who can name a # salmon stream w. the annual runs that doesn't have anadromous DV during the summer. Anadromous Ct are not found in all # streams, they are listed only where it is a known fact that they occur. If this, our best Professional judgement is not good enough for use in the atlas, then we can strike a lot out of the Catalog.
