Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

Trapping for a King salmon evaluation project has not shown King salmon usage. Coho & Dolly Varden are rearing up to a potential barrier up to several miles upstream than now shown. Mainly in side clearwater areas.

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.
