Name of Waterbody (if known): uncataloged

Richard Reed
10/11/84

Location:

Anadromous Waters Catalog Volume and Number Southeastern, Vol. 1

USGS 1:63,360 Quadrangle Craig A-4

or 1:250,000 (if 1:63,360 not available) ____

Species	Date(s) Observed	Stage(s) (Spawning, Rearing, Migration)
Coho	8/15/84	rearing
pink	8/15/84	in estuary
Chum.	8/15/84	spawning

Comments: Please provide any clarifying information. Also, please include a map of the area identifying the stream reach. This can be a copy of the map from the Anadromous Waters Atlas.

map and stream survey are attached.

ROCK 6-20"	40		
RBBL 3-6"	30		
GRVL ¼-3"	5		
SAND/SILT			
% ASA	Some for chum		
QUALITY			
REARING QUALITY	Poor		
FISH SPECIES	Co? Dv		
LENGTH RANGE			
ABUNDANCE			

COMMENTS (MIGRATION BARRIERS, BLOWDOWN, LEAVE TREES, FLAGGING, TAGS, ENHANCEMENT OPPORTUNITIES, TEMPERATURE SENSITIVITY, RECOMMENDATIONS)

≈200' 1 small trib on right bank (Water Quality)
≈250'+300' 2 small tribs on left bank (water Quality)
+10% overall grade all the way up

Mainstream probably resident fish, although their are no major blockages (ie) waterfalls
Alot of suspended LOD Throughout the whole stream
Alot of Vac, DC, SB
Could have problems if sides are logged, could have alot of erosion problems & siltation of stream because of V-notch hollow
BAD bank stability

Genes Notes
River Bay 21-29 - except 23
small very steep gradient H_2O quality
No fish habitat, but V-notch characteristic is prevalent
some probably are dry most of the summer
