Public Review Nomination for Waters
Important to Anadromous Species

84-675

☑ Addition ☐ Deletion

Name of Waterbody (if known): KROGH LAKE CREEK AND TRIBUTARIES

Location:

Anadromous Waters Catalog Volume and Number SOUTHEAST ALASKA

USGS 1:63,360 Quadrangle CRAIG D-1 + D-2

or 1:250,000 (if 1:63,360 not available) _____

Species	Date(s) Observed	Stage(s) (Spawning, Rearing, Migration)
Coho fry	6-5-83	Rearing throughout stream
DV, CT Fry	6-5-83	Spawning in Area 'B'
Pink, Chum	6-5-83	Spawning

Comments: Please provide any clarifying information in addition to identification on Anadromous Waters Catalog Public Review Maps. Add trib # 107-10-10050-2008

Coho, Dolly Varden, and Cutthroat Fry were observed through section 6 of survey Area 'B'. Surveyors assumed that DV and CT fry were offspring of anadromous adults since barriers to these species were not noted. A beaver dam at section 16 of Area 'A' is a probable barrier to pink and chum salmon migration

Upper points document limits of fish surveys and usually not the extent of fish habitat.

CONTOUR INTERVAL 100 FEET
DATUM IS MEAN SEA LEVEL
DEPTH CURVES IN FEET - DATUM IS MEAN LOWER LOW WATER
SHORELINE SHOWN REPRESENTS THE APPROXIMATE LINE OF MEAN HIGH WATER
THE AVERAGE RANGE OF TIDE IS APPROXIMATELY 14 FEET
