Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

Drainage for St James River is incorrect on map. 10460-2005 is
actually 2 separate creeks
actually 2 separate drainages with 2 separate out lets
upper drainage of 2005 actually drains through red line drawn on map.
Creek would most likely be labeled 115-10-10450

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.
