Drafted Date

Species	Date(s) Observed	Spawning	Rearing	Migration
Coho Salmon	1984, 1985	will spawn in the fall of 1986	X	
Steelhead Trout	6/86	observed migrating upstream to spawn		X

Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

The completion of a fishpass in May 1986 opened up the upper reaches of the south fork to anadromous fish. Steelhead adults moved through the fishpass within an hour after opening it. Coho fry have been stocked in the upper portion of the watershed for 2 years

Add steelhead to north fork and lower upstream limits because of 15 foot falls (Coho)

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.
