FOOT SURVEY

Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

This creek originates from upwelling springs near the ~~Kl~~ Klehini mainstem. Numerous chum carcasses lined the banks and two chum were seen in the creek. About 10 adult Dolly varden were spawning in the creek. Dolly varden and coho fry were rearing in the creek. This creek also serves as an overflow channel for the Klehini during high water

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.
