Drafted Date

Species	Date(s) Observed	Spawning	Rearing	Migration

Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

The current atlas has the main channel of the Old Situk River in the wrong place. Using USFS modified quads which have FH10 in the correct location and USFS aerial photos from 9/4/86 and field observations from several stream surveys I have placed the stream bed in the correct channel.

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.

Species	Date(s) Observed	Spawning	Rearing	Migration

Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

The main channel is mismapped - especially the Forest Highway 10 crossing and junction with the main Situk River - see enclosure

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.
