Anadromous Water Catalog Volume Southeastern Region 1
 USGS Quad (3) Craig D-2
 Name of Waterway _____
 Anadromous Water Catalog Number of Waterway 106-10-10100

REGION I
 JUNEAU

For Office Use

Nomination # _____	
<u>Richard Reed</u> Regional Supervisor	<u>8/21/86</u> Date
<u>OK SRS</u>	<u>10/29/86</u>
<u>F1</u> Drafted	<u>10/23</u> Date

Change to _____ Atlas
 _____ Catalog
X Both
 Addition _____
 Deletion _____
 Correction X
 Name addition:
 USGS name _____
 Local name _____

Species	Date(s) Observed	Spawning	Rearing	Migration
<u>Pink</u>	<u>8/15/86</u>			<u>X</u>

Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

The upstream limit of pink salmon passage needs to be moved downstream from the location indicated in the present catalog. An 18 meter stretch of bedrock with a gradient of 35% was found that would be a barrier to pink salmon passage. There may well be more barriers to pink salmon downstream because this stretch of the stream was not surveyed.

I noticed that the chum salmon anadromous limit is denoted as being about another mile downstream from the location indicated in the present catalog.
 Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.

Name of Observer (please print) Craig Burns
 Date: 8/18/86 Signature: Craig A. Burns
 Address: ADF+G Box 82
Petersburg, AK 99833
 Signature of Area Biologist: Donald A. Couvel

Upper points document
limits of fish surveys
and usually not
extent of fish habitat.
