Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

Excellent quality spawning and rearing habitat are present in this small stream.
The stream has a large clearcut on the west bank. Scrub hemlock were left as a
leave strip. Large woody debris was left untouched in the stream, contributing to a
good combination of gravel riffles and pools.

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.

Name of Observer (please print) Craig Burns
 Date: 7/24/86 Signature: Craig A. Burns
 Address: ADF+G Box 667
Petersburg, Alaska 99833
 Signature of Area Biologist: Donald A. Coumel
