Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

Rearing coho were commonly observed during a habitat survey of this small stream. Patches of spawning substrate suitable for coho were available. A beaver dam area was noticed downstream of the same site. No barriers were observed and coho may use upstream habitat.

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.
