Richard Read — Regional Supervisor — 10/16/87 Date

SPS — 10/17/87

FI — Drafted — 11/12/87 Date

Species	Date(s) Observed	Spawning	Rearing	Migration
Coho	10/12/87	X	X	

Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc. Stream has an excellent pool/riffle ratio with excellent spawning habitat - portion of stream above road
4 adult coho were observed in survey area plus presence of juveniles was verified in tributaries and main stream. This stream is beginning to recover from effects of upstream logging across the stream channel which has resulted in considerable siltation in the past. The stream is still "flashy" though with considerable evidence of flooding into adjacent riparian habitat.

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.

Name of Observer (please print) Don Cornelius

Date: 10/13/87 Signature: Don Cornelius

Address: ADF&G Box 667

Petersburg, AK 99833

Signature of Area Biologist: Don Cornelius
