Name addition:
USGS name _____
Local name Deer Creek

Species	Date(s) Observed	Spawning	Rearing	Migration
<u>Coho & Dolly Varden</u>	<u>9-20-88</u>	<u>x</u>	<u>x</u>	<u>x</u>
<u>Steelhead</u>	<u>reported in 1987 on main fork & N.F. Deer Ck by Bob Girt, Sealaska logging engineer</u>	<u>x</u>	<u>x</u>	<u>x</u>

Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc. On Sept 20, 1988 one minnow trap was set at the upper bridge crossing of Sealaska's logging road through Unit #7, midway in Sect. 36. Sixteen juvenile (2 age class) Coho and 9 Dolly Varden were captured in three hours. This extends the known anadromous habitat in Deer Creek three quarters of a mile. Stream has been heavily impacted by logging.

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.
