Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

Extension to watershed which flows into the south end
of Hole-in-the-Wall. Forest Service implementation of
bridge removal was partly done, because of excess gravel
left in channel at road crossing. Coho juv. observed
upstream of road crossing, however

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.
