FI — Drafted — 11/14/89 Date

Species	Date(s) Observed	Spawning	Rearing	Migration

Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

On about June 9, 1989 a barrier falls of approx. 25 ft. in height was observed along Halfmile Creek, approx. 2,000 ft. upstream of the Klawock-Hollis Highway. Thus, cataloged portions upstream of the barrier falls should be deleted from the atlas. The falls were deemed impassible to all fishes because of an inadequate plunge pool and the vertical nature of the falls.

T. 73S, R. 81/82E, S. 12, 7, 8, 5, 34

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.

Name of Observer (please print) Glenn Freeman
