Nomination #	<u>90</u>	<u>19</u>
<u>Richard Reed</u> Regional Supervisor		<u>10/2/89</u> Date
<u>813</u>		<u>11/1/89</u>
<u>FI</u> Drafted		<u>11/9/89</u> Date

Species	Date(s) Observed	Spawning	Rearing	Migration

Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

In June 1989, U.S. Forest Service personnel from Craig Ranger District reported that anadromous fish habitat is limited to the lower stretches of this stream because stream gradients exceed 12% upstream from approx. 400 ft. elev. The stream is cataloged for PS & CH and because it is somewhat remote, I was unable to field verify. This appears reasonable

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.
