Drafted Date

Species	Date(s) Observed	Spawning	Rearing	Migration
Coho Salmon	7/11/90		X 26 fish	

Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

Small marsh with deep water areas is small but excellent rearing for coho Salmon (observed) and other salmonids favoring marshy-habitat.

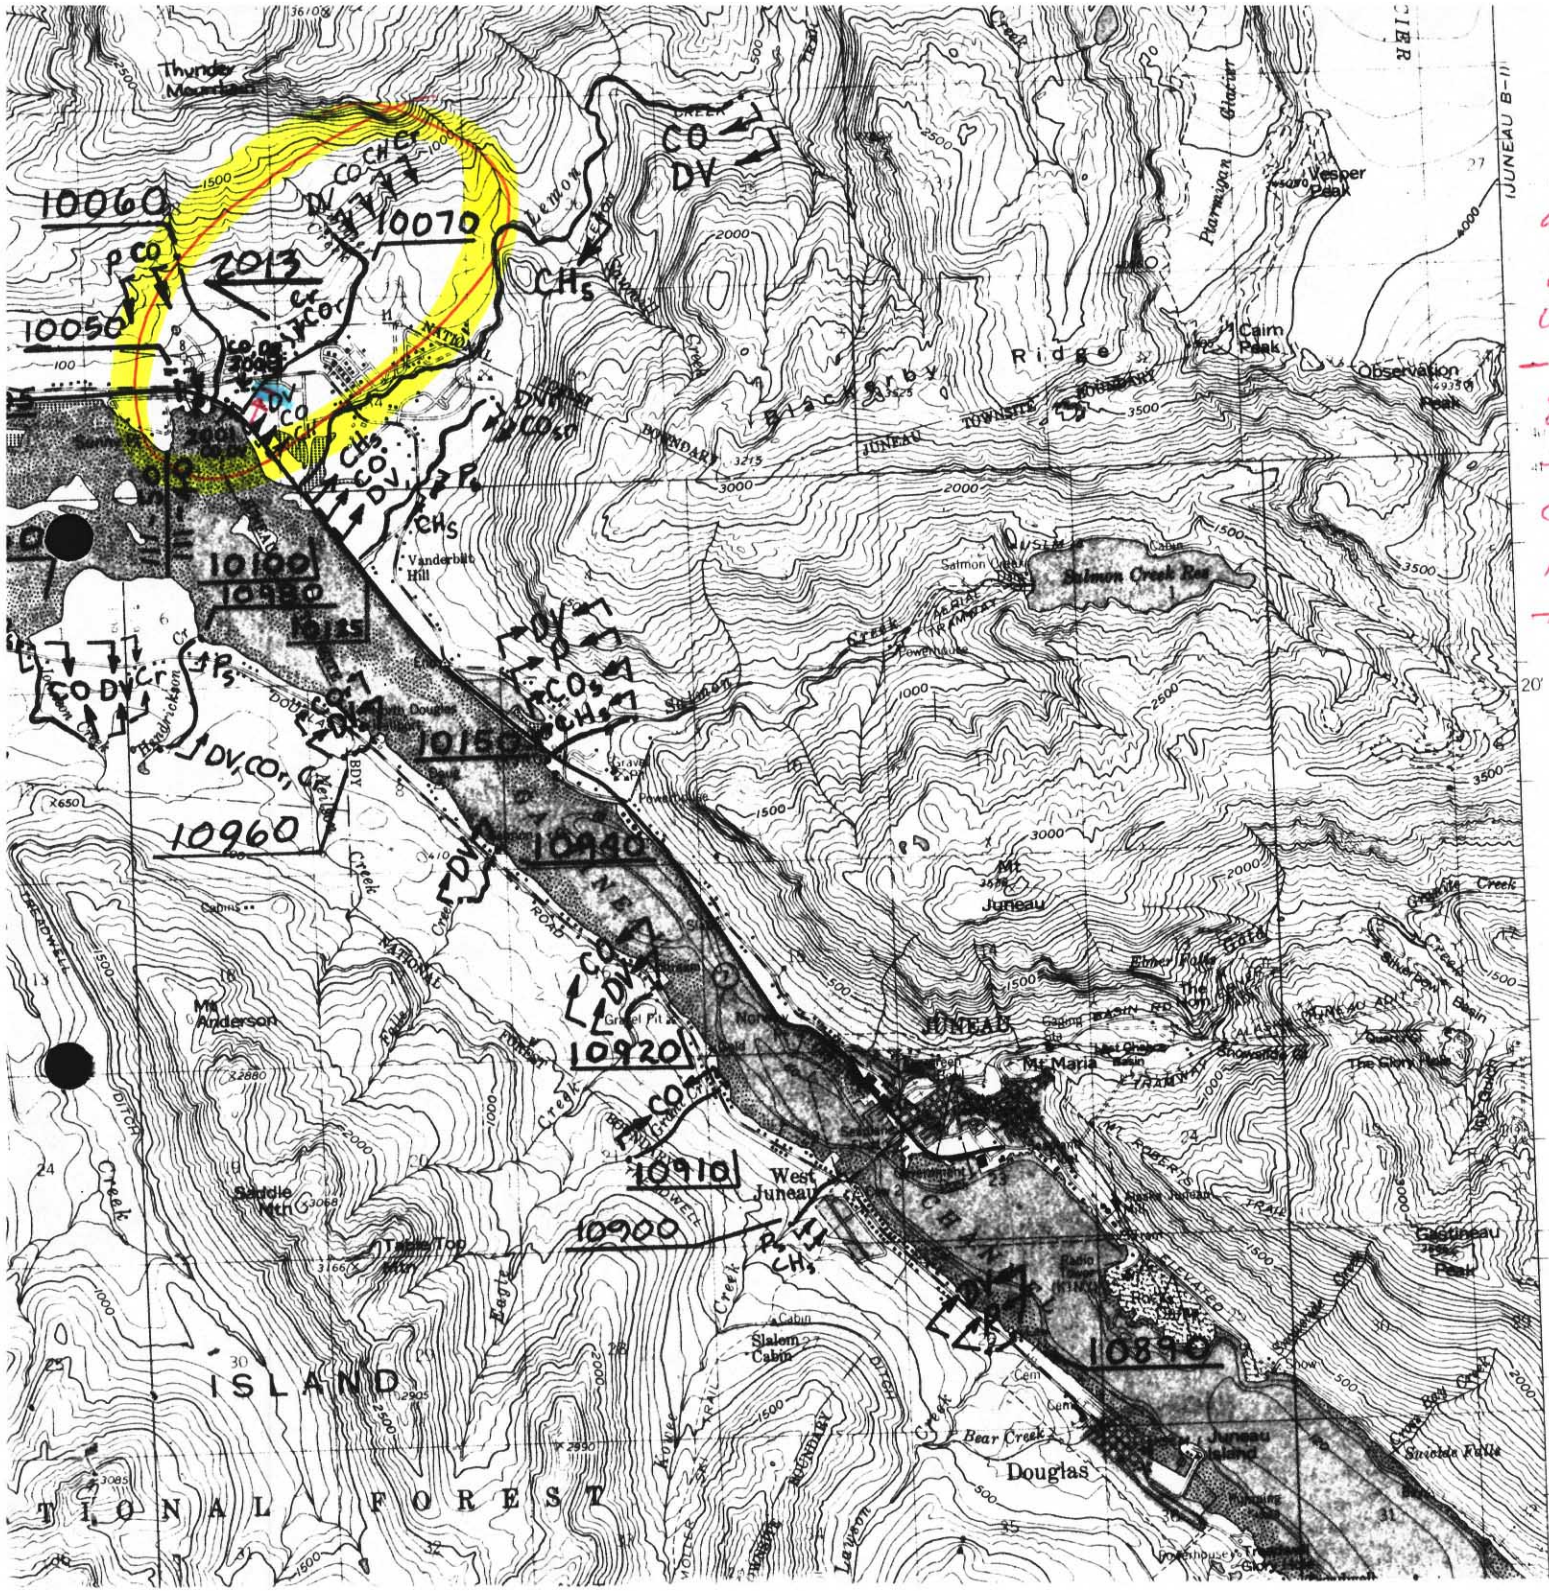
Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.

Name of Observer (please print) MIKE BETHERS

Date: 8/8/90 Signature: Michael Bethers

Address: P.O Box 20 Douglas AK 99824

Signature of Area Biologist: Michael Bethers Janet Schempf



26 coho fry/rearing observed in established area on 7/11/90 by Mike Bethers. Coho were hatched from spring - very likely 1989 brood. Small drainage is excellent seasonal coho rearing - and likely for other salmonids too.

M. Mc Bethers
