Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

A 13-step pool-and-weir fishway now provides access for pink salmon. Only coho, steelhead, and Dolly Varden had previous access.

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.
