OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Migration	Anadromous
Coho	9/14/92		✓		
Dolly Varden	9/14/92		✓		

Provide any clarifying information, including number of fish observed, location of fish survey data, etc. Attach a copy of the fish survey data, if available. Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls.

Comments:
Due to gradient of this stream we questioned whether it had been miscataloged. Electroshocked two juvenile coho (1+ and 2+) and one Dolly Varden char below Mitkof Highway. Also turned over other fish. Falls below and above highway plus culvert all restrict upstream fish passage. No fish shocked above highway
