REGION II
HABITAT DIVISION

AWC Volume (SE) SC SW W AR IN USGS Quad CRAIG B-4

Anadromous Water Catalog Number of Waterway 103-60-10515

Name of Waterway Clinton Creek USGS name ___ Local name X

Addition ___ Deletion X Correction ___ Backup Information X

For Office Use

Nomination # 93 047

Revision Year: ___

Revision to: Atlas ___ Catalog ___ Both X

Revision Code: D-1 B-1

Regional Supervisor — Date: 10-9-92

Ed Ukin — 12/15/92

Drafted — Date: 1/5/93

OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Migration	Anadromous
coho salmon	4/9/92		X		Yes

Provide any clarifying information, including number of fish observed, location of fish survey data, etc. Attach a copy of the fish survey data, if available. Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls.

Comments:

Not sure stream flows above ground along route shown on USGS maps. At very least, need to add coho to bottom end, and delete upper portion of pink habitat, since very steep. See attached field notes & inspection report.

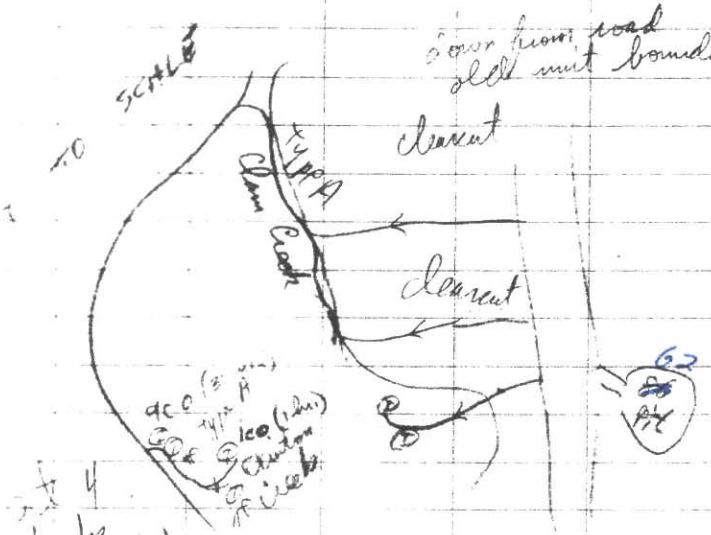
9 April (cont.)

it steepens up soon

(cut) #NR1 looked at 48" dbh hemlock 62' from OHW of Buck Creek, + 66' from Nicholas River

H that tilted away from stream will be limbed off 25' from OHW; even if sits up, Peterson says won't enter OHW

drove to CB-92-62



9 April (cont.)

Clinton Creek parallels roads 200-300, turns & goes 200' ⊥ to beach (38); Tide halfway up, Type A 40', Then C Waters (Algae) around point to ancient beaver dam system, stagnant; headed over hill back to 62 pit, then cross stream going through woods; comes down from road, Then turns N; set 2 traps

Clam Creek comes down from road; cleared; looks like road for next boundary to N; Tide comes in from E, whole mess continues N, then turns W to saltwater; observed fry in pools, no ID or trapping; designated Type A w/ Thomas' concurrence
