10 April (cont.)

another seepy trib or two, including one that flows well on occassion (53" gravel bedload in places) but was subsurface on inspection in places (Type c)

checking out creeks in CB-92-5:

Orange Creek

2300 S most - orange stain; nasty; 1 trap in hole midway; 3'

3000 "orange 2" = "Miserable" next creek; clear & nice; 3' 1 trap just upstream bluffer

Dump Creek alleged ?rd =Pump House Creek

nice creek next; one through upper culvert by trailer court; 1E 1 trap in first trappable hole (steep & platty shallow but ok for fish); 1DV 1 trap by mouth

10 April (cont.)

several C ish seeps

pulled after 1 24 hrs. n.f.

stream w fry in intertid; >8% at bluffer line, so did not trap; comes out by pull-out beach w/ alder

stream at S point @ mouth Crab Creek; looks ok; float home near for domestic water, so 2 dams by time it leaves the bluffer; OK above, but bluffers provide adequate protection on stream

walked to upper end Crab Bay, cataloged stream #103-60-10495 "Dipstick Creek"; new highway has furnished culvert; only place above it to trap was immediately above, so placed 1 trap
