OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Migration	Anadromous
Coho	6/25/92		X		

Provide any clarifying information, including number of fish observed, location of fish survey data, etc. Attach a copy of the fish survey data, if available. Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls.

Comments:

The stream segments indicated on the attached map were located during a fisheries survey of a planned road. A fish shocker was used to verify their presence. Both spawning and rearing habitat was present and there is extensive beaver activity along both streams. This area is being considered for State Land selection.
