OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Migration	Anadromous
Coho (Fry)	6/25/92		X		
Sockeye	September 1991	X			

Provide any clarifying information, including number of fish observed, location of fish survey data, etc. Attach a copy of the fish survey data, if available. Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls.

Comments:

The stream segments indicated on the attached map were located during a fisheries survey of a planned road. A backpack fish shocker was used to collect fish. Though only a few coho fry were shocked at each location to confirm, they were numerous at each site. Both spawning and rearing habitat was present.
