OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Migration	Anadromous
Coho (Fry)	6/25/92		X		
Sockeye	September 1991	X			

Provide any clarifying information, including number of fish observed, location of fis survey data, etc. Attach a copy of the fish survey data, if available. Attach a copy of map showing location of mouth and upper points of each species, specific stream reache identified for spawning or rearing, locations of barriers, such as falls.

Comments:

The stream segments indicated on the attached map were located during a fisheries survey of a planned road. A backpack fish shocker was used to collect fish. Though only a few coho fry were shocked at each location to confirm, they were numerous at each site. Both spawning and rearing habitat was present.

Name of Observer (please print) James P. Carrillo
