Nomination # <u>94 160</u>	<u>Laneflus</u>	<u>11-1-93</u>
Revision Year: <u>94</u>	Regional Supervisor	Date
Revision to: Atlas _____ Catalog _____	<u>ED Wain</u>	<u>12/22/93</u>
Revision Code: <u>A-2</u>	<u>J. Irone</u>	<u>1/6/94</u>
	Drafted	Date

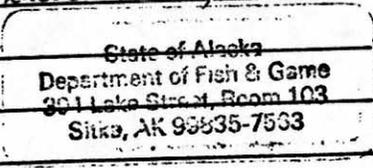

OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Migration	Anadromous
<u>coho salmon</u>	<u>5/19/93</u>		<u>X</u>		<u>X</u>
<u>DV</u>			<u>X</u>		

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as any other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

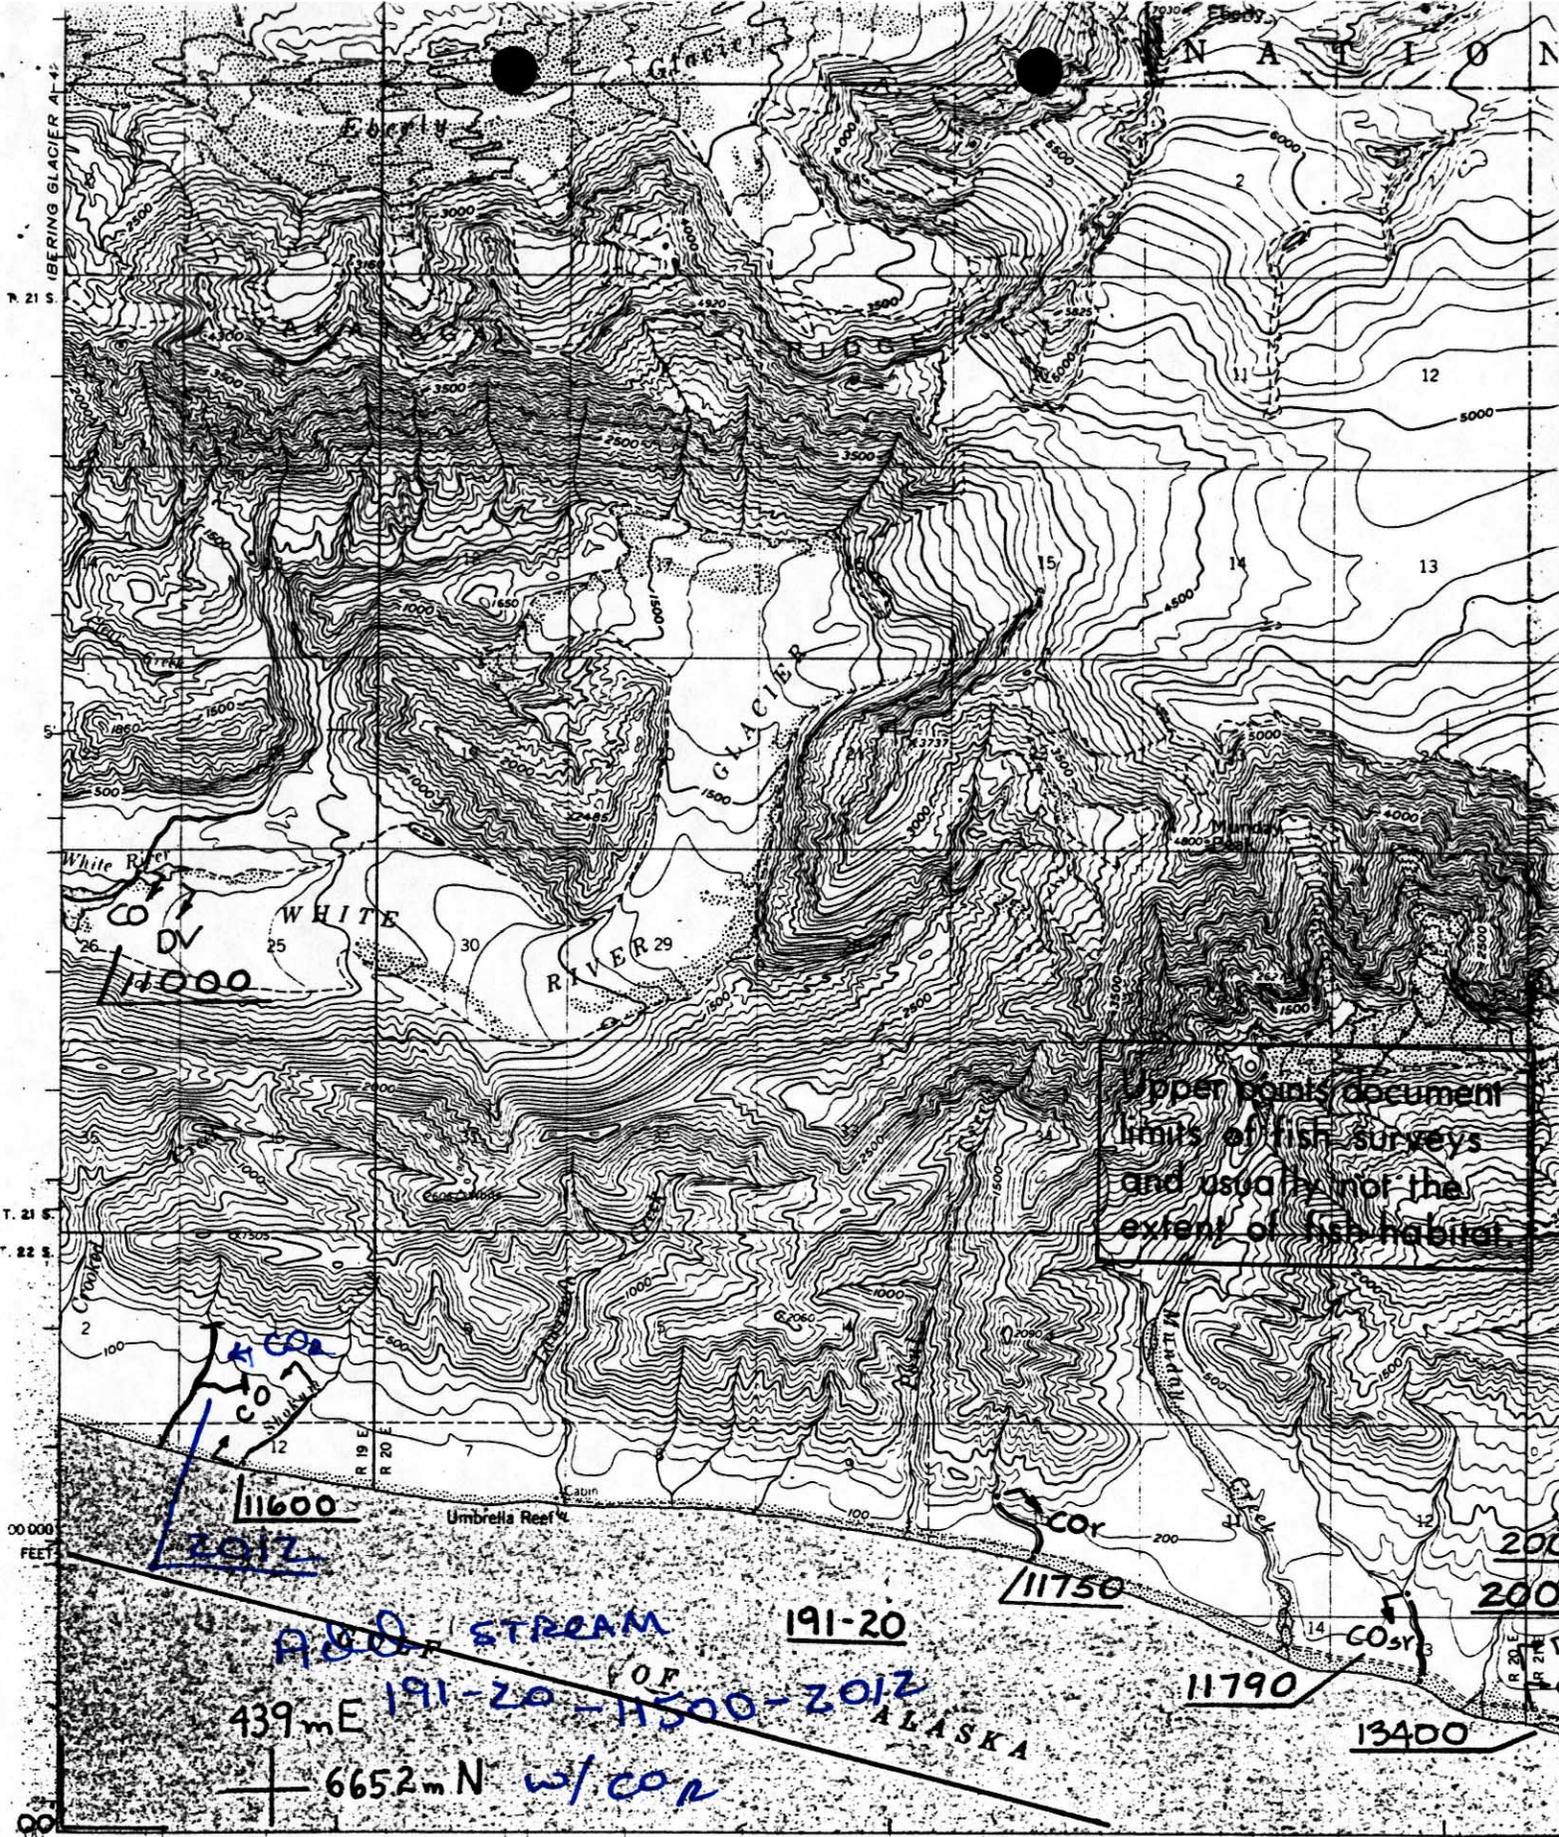

Comments: Foot survey of stream during forest practices work. Stream was hand trapped in 3 locations (below logging road culvert and 2 locations above culvert [upstream]). All locations produced large 3-5" coho smolts as well as coho fry. Dolly Varden fingerlings (4-5" long) were also captured at each site. A small trib - enters the east side of the creek - above the road & paralleling it... flowing 1500' east to west. Coho fry/smolts + DV were also captured in it. This trib enters the old cutting unit #6.

Name of Observer (please print) Phil Mooney, Mike Peacock (DNR), ED Emsweiler (DEC)  
 Date: 10/20/93 Signature: Phil Mooney  
 FISH & GAME Address: \_\_\_\_\_  
 NOV 01 1993

This certifies that in my best professional judgement and belief the above information is evidence that this waterbody should be included in or deleted from the Catalog of Waters Important for Spawning, Rearing or Migration of Anadromous Fishes per AS 16.05.870.

Signature of Area Biologist: Diane Hardy

Upper points document limits of fish surveys and usually not the extent of fish habitat
