<u>Coho salmon</u>	<u>9/11/93</u>	<u>X</u>	<u>X</u>		<u>X</u>
<u>pink salmon</u>	<u>9/11/93</u>	<u>X</u>			<u>X</u>
<u>Dolly Varden Char</u>	<u>9/11/93</u>		<u>X</u>		

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as any other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: Foot survey 9/11/93 - saltwater upstream to 350' (stream length). At that point, low water conditions contributed to a block of adult fish passage. Coho smolts & DV fingerlings captured in pools above the barrier. 95 pink salmon (live) and 13 cohos (live) were counted from the barrier downstream to the saltwater estuary.
