IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as any other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: Foot survey during forest practices inspection located coho fry & smolts above a barrier previously thought to block fish movement upstream. Upper reaches of stream were trapped in four locations. Coho fry/smolt & DV were captured at each site. From phone conversation w/ ALASKA DPT. OF FISH & GAME 12/8/93 tower trap site where road crosses stream filed trap w/ COHO JUV. AT UPPER SITE CAUGHT ~ 1/2 doz. EW
