OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Migration	Anadromous
<u>Chum salmon</u>	<u>9/23/93</u>	<u>X (CARCASSES)</u>		<u>X</u>	<u>X</u>
<u>pink salmon</u>	<u>9/23/93</u>	<u>X (CARCASSES + LIVE)</u>		<u>X</u>	<u>X</u>
<u>Coho salmon</u>	<u>9/23/93</u>	<u>X (30+)</u>		<u>X</u>	<u>X</u>

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as any other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: Foot survey along upper portion of stream where it enters the lake. All chum salmon and most of the pink salmon were spawned out carcasses. A few pinks were still alive (12+). Bright coho salmon were noted moving upstream and entering the lake.) Predation by bears and land otters was noted. Local residents report the stream and small lake support a limited sockeye run, but this was not confirmed.

no block to pinks or chums to enter lake. PINKS & CHUM OBSERVED UP TO LAKE MOUTH. COHO SEEN ENTERING LAKE NOT SURE OF DISTRIBUTION ABOVE IT
