Nomination # <u>95 210</u>	<u>Janaefhus</u>	<u>11-1-94</u>
Revision Year: <u>95</u>	Regional Supervisor	Date
Revision to: Atlas _____ Catalog _____	<u>Ed Wein</u>	<u>12/9/94</u>
Both <u>X</u>	<u>Z. Drove</u>	<u>12/13/94</u>
Revision Code: <u>A-1</u>	Drafted	Date

OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Migration	Anadromous
coho salmon	5/19/94		20+		yes
Dolly Varden char	5/19/94		X		unknown

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area samples; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as any other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: Electrofished during Forest Practices Inspection, Tributary to Little Salt Creek, or directly to estuary depending on beaver dam heights. Previous examinations had documented only Dolly Varden (presumed resident), or coho in lower end. This inspection documented abundant coho juveniles up to where gradient increases from 8% to 10% and more as nears Big Salt Road.

ACTION: Extend CO, as shown on map.
