Revision Code: <u>B-1</u>	Drafted	Date

OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Migration	Anadromous
chum salmon	10/21/94	5+			X

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area samples; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as any other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: During Forest Practices Inspection, found at least 5 sets of chum jaws on bank where bears had left carcasses.
A very productive stream; 15'-20' OHW; 2%-5% grad; gravel substrate; LWD frequent; silty, undercut banks. Lots of pink bones on banks.

Action: add chum to species, downstream of 6000 Road.

Name of Observer (please print) James D. Durst, Habitat Biologist
